THE PROBLEM

One new hire.
Too many disconnected handoffs.

From contract review to first-day preparation, HR must carry the context across documents, people and systems.

01	02	03	04	05
Manual contract review	**Fragmented workflow**	**Policy checks**	**IT coordination**	**Delays & follow-up**
Read the document, extract key facts and re-enter employee details.	Track ownership across spreadsheets, messages and separate systems.	Compare contract facts with the relevant company rules and resolve gaps.	Request accounts and equipment, then follow up with another team.	Chase approvals and missing documents before onboarding can progress.

THE BUSINESS NEED

A connected process that understands the objective, carries work forward and brings people in when judgment is required.

Illustrative traditional workflow.
No survey findings or quantified delay claims.
