HUMAIN LIFECYCLE

01 / THE WORKSPACE

A clearer view. A connected operation.

Actual application capture | Local synthetic demonstration workspace

ONE WORKSPACE

See the workforce

Employees, active onboarding and upcoming deadlines.

Coordinate work

Contracts, journeys, internal tasks and communications.

Inspect outcomes

Persisted records, execution evidence and an audit trail.

Dashboard counts describe this synthetic workspace, not business impact or AI accuracy.

02 / AI ARCHITECTURE

One objective. Five coordinated capabilities.

HUMAIN Chat plans with Qwen3.5:4b; permission-checked FastAPI tools execute the workflow and verify persisted outcomes.

Objective + contract

CSV / XLSX / text PDF
User request + approved context

HUMAIN CHAT

Qwen3.5:4b / host Ollama

Understand objective > plan > call tools > report evidence

Human exception review

Missing facts, policy findings and PDF review pause for a human decision.

TOOL EXECUTION BOUNDARY

Contract Intelligence

Extract structured facts; retain source bytes and fingerprint.

Policy Validation

Apply activated, versioned rules; surface source-linked findings.

Onboarding Automation

Create employee + contract; prepare HR tasks and simulated IT requests.

Compliance Monitoring

Monitor contract, Iqama and work-permit expiry windows.

Communications

Approved templates + recipients; durable outbox and SMTP receipt.

PostgreSQL 17 / durable system of record

Contracts + policies + journeys + tasks + email jobs + audit
Transactional writes, duplicate prevention and verification of saved outcomes.

Bounded autonomy

Human approvals remain human. IT provisioning is simulated. Deadline signals are not legal certification.

Implemented architecture, not an evaluation result. Structured policy checks are separate from legal clause review. This local prototype is not a production deployment.

03 / VERIFIED PROJECT EVIDENCE

Automation setup verified. Onboarding still pending.

Saved synthetic example: Journey Demonstration | Journey 4159d478-be6a-457b-bc5a-b80b2fb34ddb

37.036 s
Full Qwen request

2.074 s
Core workflow execution

5 tasks
3 human pending + 2 simulated IT

SMTP accepted
Inbox delivery unconfirmed

A / ACTUAL JOURNEY PLAN

Journey Demonstration
onboarding from synthetic contract

Verified

2.1s	0	1
Workflow execution	Review / resume actions	Execution attempts

- Read contract — verified
- Validate contract facts (no company policy selected) — verified
- Create employee and contract — verified
- Prepare HR tasks and IT requests — verified
- Send authorized welcome — verified
- Verify persisted outcomes — verified

No company policy was selected for this run. The verified result covers contract facts, saved records, tasks and authorized welcome execution.

B / ACTUAL TASK BOARD

Internal HR task board

These tasks are persisted in HUMAIN. Completing a human task records your attestation; simulated IT requests cannot be completed as real accounts.

Task	Due	Status	Action
IT equipment request (simulated) Employee 630421cd-afe3-449e-bed0-25f1135feb8b	2026-10-30	Simulated Request	
IT account provisioning request (simulated) Employee 630421cd-afe3-449e-bed0-25f1135feb8b	2026-10-30	Simulated Request	
Schedule orientation Employee 630421cd-afe3-449e-bed0-25f1135feb8b	2026-10-30	Pending	Mark completed
Collect onboarding documents Employee 630421cd-afe3-449e-bed0-25f1135feb8b	2026-10-30	Pending	Mark completed
Verify identity and Qiwa approval Employee 630421cd-afe3-449e-bed0-25f1135feb8b	2026-10-30	Pending	Mark completed

C / ACTUAL SMTP RECEIPT

SMTP execution history

A server acceptance receipt does not verify inbox delivery.

<84b82dbb-4798-4622-8a93-a77b9853057f@humain.local>	Smtp Accepted	SMTP server accepted the message; inbox delivery is unverified

D / ACTUAL JOURNEY AUDIT

ACTION	REFERENCE	ACTOR	TIME
journey.verified	4159d478-be6a-	Authorized user	10/30/2026, 12:52:52 PM
journey.created	4159d478-be6a-	Authorized user	10/30/2026, 12:52:50 PM

Single observed run; not a held-out benchmark. Full request includes model planning; workflow timing excludes it and human task completion. No manual baseline or time-savings claim. Live UI captures: 30 Oct 2026. Timing source: docs/JOURNEY_LIVE_EVALUATION.json.
